WHAT WE DO

CARGO HANDLING and PORT OPERATIONS

Handling many tons of cargo each day ensures our automated and integrated systems are well managed. We do this by having a centralized computer system that drives every handling process and monitors all cargo movement. The types of vessels handled are varied and include bulk carriers.

Our diligent end-to-end handling of cargo delivery and our cost-effective rates ensure that our clients remain competitive in the global markets in which they operate.

PVI also delivers services of 'Owners Protective and Charterers Agents' at Mina Saqr Port.

With the current trends of better load rates & shorter port stays, our agency team stays in touch with the vessel, shippers, receivers and the concerned authorities well in advance of the vessels arrival at port to ensure speedy clearance and commencement of cargo operations.

We give regular reports and updates on port conditions, vessel and cargo movements which is our greatest strength and we are involved in all aspects of cargo operations, right from handling and supervision at the ports to warehousing, thus enabling us to offer precise inputs on cargo readiness, and report and assist on the timely movements of cargo.

PVI has office premises in the port area ensuring 24/7 control of operations.

STEVEDORING

Ships make money for their owners when they are laden and at sea. We ensure that the ships turnaround is fast to cut costs for both charterers and owners. PVI currently operate a well-staffed establishment capable handling an annual average of 2 million tons.

We provide the traditional services of stevedoring i.e. loading and unloading ship cargo and provide intermodal cargo handling services, namely transferring vessel borne cargo to trucks.
